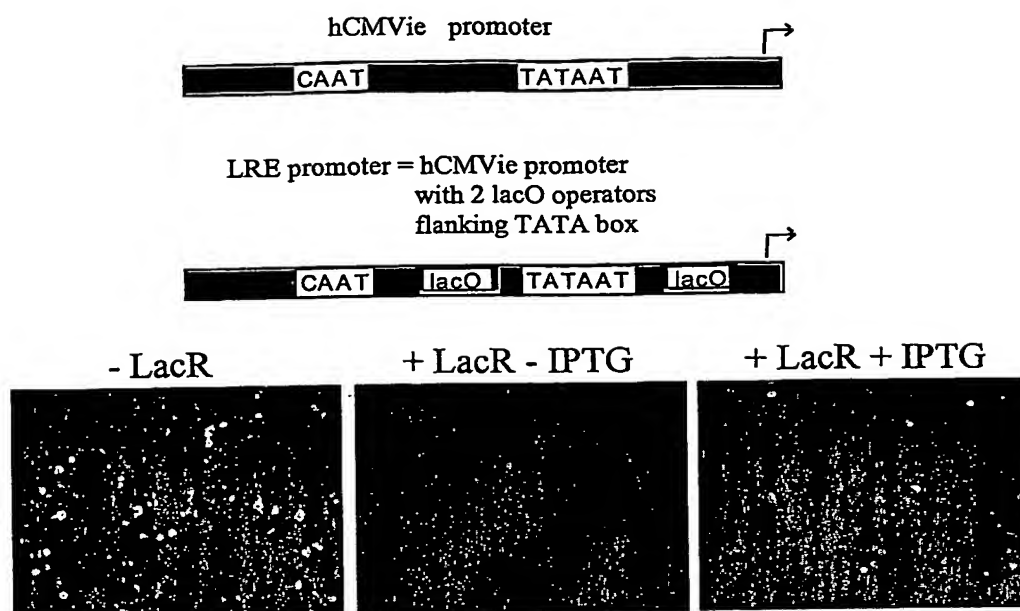

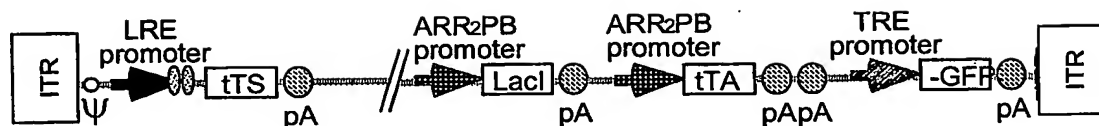

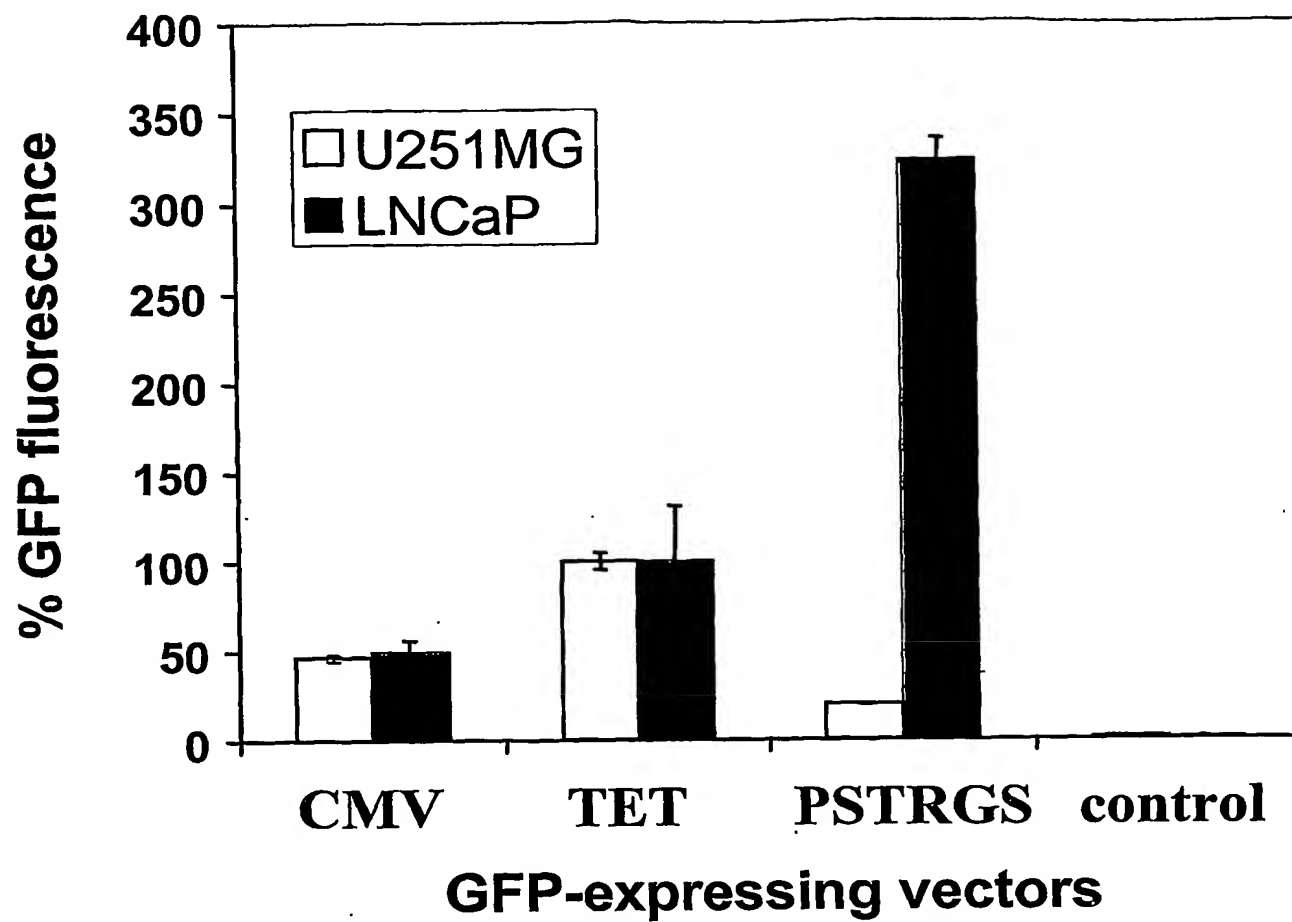

Fig. 6A

Prostate cells	vs.	Non-Prostate cells
1. ARR₂PB (prostate-specific) promoter induced ↑ tTA, ↑ LacI expression		1. ARR₂PB promoter not induced ↓ tTA and LacI not induced
2. tTA induces expression from promoters containing TRE: ↑ GFP		2. Little to no LacI production ↑ tTS
3. LacI represses promoters containing lacO: ↓ tTS		3. tTS represses background expression from promoters containing TRE: ↓ GFP
